---

---

### **OVERALL RESPONSIBILITIES**

The Avionics Mechanic is responsible for the functional testing, repair/maintenance, and inspection of aircraft electrical and avionics systems. This can include but is not limited to radar, lighting, radio, and navigational systems.

### **ESSENTIAL DUTIES**

- Installation, inspection, and operational testing, of avionics equipment, such as radar, radio, navigation as well as electrical system wiring and modifications.
- Diagnose and troubleshoot avionic and electrical issues that may arise.
- Research technical data and perform inspection, testing, adjusting, and repair of avionics systems.
- Experience in using industry standard tools; such as, digital meters, meggers, and pitot static equipment.
- Adjust, repair, or replace defective components based on analysis of test results.
- Read and decipher blueprints, schematics, handbooks, and other technical documents.
- Calibrate installed or repaired equipment to prescribed specifications.
- Perform any other duties assigned by the Direct Supervisor or Direct Manager.

### **Preferred Qualifications:**

- FAA A&P License
- FCC License preferred.
- High school diploma or equivalent.
- Occasional travel to perform duties away from base.
- Must be able to read, write, and understand the English language.
- Must provide basic tools.
- Four (4) years, preferred, two (2) year minimum.
- Valid, unrestricted Driver's License.
